Volume 231 October 1991

CONTENTS

A steady separated viscous corner flow. Robert McLachlan *page* 1

Inviscid spatial stability of a three-dimensional compressible mixing layer. C. E. Grosch and T. L. Jackson 35

Slow viscous flow due to motion of an annular disk; pressure-driven extrusion through an annular hole in a wall. A. M. J. Davis 51

Spanwise pairing of finite-amplitude longitudinal vortex rolls in inclined free-convection boundary layers. C. C. Chen, A. Labhabi, H.-C. Chang and R. E. Kelly 73

Throughflow effects on convective instability in superposed fluid and porous layers. Falin Chen 113

Oscillatory flow and mass transport in a flexible tube. Carolyn A. Dragon and James B. Grotberg 135

A bifurcation study of mixed-convection heat transfer in horizontal ducts. K. Nandakumar and H. J. Weinitschke 157

Experimental and theoretical investigation of large-amplitude oscillations of liquid droplets. E. Becker, W. J. Hiller and T. A. Kowalewski 189

Boundary effects on the electrophoresis of colloidal cylinders. Huan J. Keh, Kuo D. Horng and Jimmy Kuo 211

Experiments on transitional boundary layers with wake-induced unsteadiness. X. Liu and W. Rodi 229

Evolution of streamwise vortices and generation of small-scale motion in a plane mixing layer. K. J. Nygaard and A. Glezer 257

Coastal Kelvin waves in the presence of a slowly varying topography. Ping Chang 303

Capillarity effects on surface gravity waves in a cylindrical container: wetting boundary conditions. Bruno Cocciaro, Sandro Faetti and Maurizio Nobili 325

The role of particle collisions in pneumatic transport. M. Y. Louge, E. Mastorakos and J. T. Jenkins 345

Linear-eddy modelling of turbulent transport. Part 6. Microstructure of diffusive scalar mixing fields. Alan R. Kerstein 361

Mass transport in two-dimensional water waves. Mohamed Iskandarani and Philip L.-F. Liu 395

Mass transport in three-dimensional water waves. Mohamed Iskandarani and Philip L.-F. Liu 417

Internal wave generation in uniformly stratified fluids. Part 1. Green's function and point sources. BRUNO VOISIN 439

Response of the shear layers separating from a circular cylinder to small-amplitude rotational oscillations. J. R. FILLER, P. L. MARSTON and W. C. MIH 481

Onset of three-dimensionality, equilibria, and early transition in flow over a backward-facing step. LAMBROS KAIKTSIS, GEORGE EM KARNIADAKIS and STEVEN A. ORSZAG 501

A parametric acoustic instability in premixed flames. G. SEARBY and D. ROCHWERGER 529

Viscous motion of disk-shaped particles through parallel-sided channels with near-minimal widths. D. HALPERN and T. W. SECOMB 545

Nonlinear instability of viscous plane Couette flow. Part 1. Analytical approach to a necessary condition. BÉRENGÈRE DUBRULLE and JEAN-PAUL ZAHN 561

The stability of filamentary vorticity in two-dimensional geophysical vortex-dynamics models. D. W. WAUGH and D. G. DRITSCHEL 575

Dynamical analysis of electrochemical wall shear rate measurements. A. A. VAN STEENHOVEN and F. J. H. M. VAN DER BEUCKEN 599

Longitudinal vorticity elements in boundary layers: nonlinear development from initial Görtler vortices as a prototype problem. A. S. SABRY and J. T. C. LIU 615

Optical studies on the turbulent motion of solid particles in a pipe flow. JAMES B. YOUNG and THOMAS J. HANRATTY 665

REVIEWS

Méthodes des Éléments Finis pour les Fluides, by O. Pironneau; *Numerical Solution of Partial Differential Equations by the Finite Element Method, by C. Johnson* 689
